

Press Release: 9th June 2013

Website Launch

The National Social Housing Fire Group is an independent and sector led body who represents the social housing sector and its main aim is to establish and impact on national policy in relation to fire safety in our communities.

Whilst the group is independent it works very closely with other partners such as the Chief Fire Officers Association, the Fire Sector Federation and other stakeholders to achieve its aims.

The Group is very pleased to announce following months of development, that our website has now been launched. The website address is: www.shfsg.info

The website has been designed to highlight the aims of the group, whilst publishing events and guidance, details of our close partners, latest news from the sector and details on membership of the group.

Currently membership is open to registered social housing providers.

We have also launched our twitter account where individuals and organisations can keep up-to-date with the work of the National Social Housing Fire Strategy Group. Our Twitter account is located at: <https://www.twitter.com/NSHFSG>
